## Objective

---

I am a self taught developer with more than two years of experience and have embarked on a journey of continuous learning and growth in the field of Software Development. Over the past few years I have explored various programming languages and tools. Through practice, projects and hands-on-experience I have gained a good proficiency in writing code, debugging issues and solving problems. I have delved into Web Development, creating websites and Web Applications using HTML, CSS, JavaScript and also using framework like React JS.
